

ENVIRONMENTAL MANAGEMENT POLICY

Scope

This policy serves as the foundation for the airport's environmental management and performance. This includes all of our employees, airport tenants, airlines, and other stakeholders.

Commitment

Our Environmental Management Policy demonstrates our commitment to a sustainable environment in airport operations, and it serves as the basis for objectives, key performance indicators, action plans, and programmes.

Management

Malaysia Airports manage the environmental aspect within a structured practice to serve better quality on environmental management.

As a result, we pledge to uphold the following key environmental principles:

- Complies with applicable environmental laws, policies, standards and other legal requirement
- Monitor and review environmental performance for continuous improvement against Environmental Masterplan
- Measuring, managing, and lowering our emissions, as well as planning for climate change adaptation
- Integrating environmental factors into our planning, procurement, and decision-making processes
- Providing and maintaining awareness in reducing environmental impact relates to airport activities
- Interacting and cooperating with our local community and other essential players engaged with Malaysia Airports

Review

Our Environment Management Policy will be reviewed every two years and updated as required. Any amendments to this policy must be approved by the Board of Malaysia Airports Holdings Berhad.
